THE BOKER, Now is the time to watch for this year's crop of borers. If you will look at the base of the tree you will indicate the location. They can be removed with a knife without injury t the tree. They will appear like a worm one-third of an inch in length. Most persons neglect this operation fill Spring, by which time they will have made a large cavity in the face, and done much injury. When they temain two years they become a large worth, in and many complaints from those who have suffered within the last two years from their rayages, and mimoush at

lare of the ground.

DAMP CELLARS. Cellars are apt to be damp, close, dark, and unventilated. In addition to this, there are usually smood in them traits, vegetables, A.c., which deepy and give large quantities of polymous gases, onlined air, especially if it is withheld from the parifying influence of the sun-and filled with moisture, soon becomes impure and untit to be breathed. If, in addition to this, it is mixed with the gasses of decomposing vegetables, i. i torms one of the smest disease-producmy agents we have. A majority of
